PROJECTSPOTLIGHT

Missouri S&T Protoplex Research Facility
Rolla, MO

OVERVIEW

The manufacturing industry and Missouri S&T joined forces to launch the Missouri Protoplex. The 171,000-square-foot facility offers prototype-scale R&D and advanced technology adoption to help U.S. manufacturers compete globally. It also serves as an education hub for the next generation of manufacturing leaders. Versa-Dek® Acoustical was selected to mitigate ambient sound while creating an exposed-ceiling aesthetic with clean lines.
